

Once upon a time, there was a place of beauty where Wine, Art & Architecture lived in harmony. It's the story of the enchanting vineyard, Château La Coste...

The project started when artists and architects were invited to create a piece of art inspired by the surrounding nature of Chateau La Coste. In return, the masterpieces would remain standing in the place of their choice within the estate. Take a walk through the wooded hilltops and valleys to discover the contemporary jewels along the way. Gourmets will enjoy understanding biodynamic wine-making thanks to a commented tour of the buildings designed by well-known Jean Nouvel. You will also find out about the many areas to drench your thirst and flatter your palate. Why not try the little « place du village » on the terrace or the Argentinian grill ?

*From 12€ per person
for the wine-making chai visit*

Château La Coste:

A treasure of Art & Architecture,

Food & Wine
